

# ACCESS CONTROL READER & CARD

## Card-Based

Mengidentifikasi berbagai tipe kartu ID dengan tepat dan mampu berintegrasi dengan sistem akses kontrol tanpa batas.

### HID Proximity

- 125 kHz RFID technology

### iCLASS Technology

- Contactless smart card; 13,56 MHz RFID technology

### multiCLASS<sup>®</sup> Technology

- Multi-technology proximity and iCLASS reader

## Access-Based

### Proximity Card

- 125 kHz RFID technology
- Read only

### Smart Card

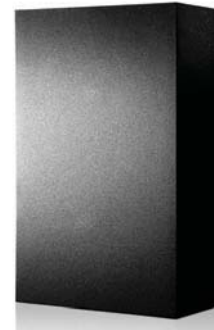

- 13.56 MHz RFID technology
- Read & re-write feature

## IP-Based

### EDGE Solo

- ESR40
- Embedded user interface
- Web-based monitoring & organizing
- Manages 1,000 card holders
- 5,000 trans log
- POE (Power Over Ethernet)
- Upgrade to host based system (optional)
- Built-in HID iCLASS reader

### EDGE Plus Solo

- ES400
- Embedded user interface
- Web-based monitoring & organizing
- Manages 1,000 card holders
- 5,000 trans log
- POE (Power Over Ethernet)
- Upgrade to host based system (optional)
- Required external reader (Wiegand 26-bit card reader & fingerprint-based)

# ACCESS CONTROL READER & CARD

BOSTEX Access Control, adalah Access Control yang berbasis IP dan database yang terpusat sehingga memudahkan pengaturan sistem. Jaringan database yang terkoneksi dan real-time memenuhi kebutuhan koneksi antara kantor pusat dan cabang-cabang. Fitur BOSTEX Access Control juga mendukung multitasking, multi-client, multi-user, cepat, dan komunikasi yang terjamin dengan sistem prioritas.

## Access Control

### 2/4/8 Door Controller

- Using 32 bit ARM CPU, speed up to 200 MHz
- Direct connection to PC via TCP/IP
- Storage capacity up to 20,000 cards and 100,000 transaction
- Firmware online upgrade via TCP/IP
- Control 2/4/8 doors

### Elevator Controller

- Using 32 bit ARM CPU, speed up to 200 MHz
- Direct connection to PC via TCP/IP
- Storage capacity up to 100,000 cards and 100,000 transaction
- Firmware online upgrade via TCP/IP
- Control one lift car up to 128 floors
- Built-in with PLC function, simplify integration between security and control system

## Enterprise Platform for Security

Selain fitur access control, Enterprise Platform BOSTEX yang disebut Integrated Security Management System (ISMS) mampu mengorganisir semua elemen keamanan dalam satu user-interface seperti Visitor and Facility Management, Time Attendance, Canteen Meal Control, Car Parking Control, Human Tracking, Guard Management, Meeting Attendance, Video Integration, Vehicle Assignment, Dormitory Management, Building Management Integration, Mobile Security Verification, dan Life safety (Fire Systems).
